## CDS Views for Master Data

This section lists master data CDS views.

### Country

Technical name	I_Country
View type	Dimension

#### Purpose

This CDS view provides access to country-specific financial data. These attributes of the Country business entity include the country, the index-based currency and the hard currency, as well as the ISO codes and the tax calculation procedure.

This CDS view provides the prerequisites for answering the following business questions:

What are the currencies of the country?

What are the ISO codes of the country?

Which procedure is used for calculating taxes in the country?

#### Structure

Business Objects - This view is built on the following business objects: Country

### Country text

Technical name	I_CountryText
View type	Dimension

#### Purpose

This CDS view provides access to the country-names in different languages. This CDS view provides the prerequisites for answering the following business questions:

Which is the English country name?

#### Structure

Business Objects - This view is built on the following business objects: Country

## Fixed Asset

Technical Name	I_FIXEDASSET
View Type	Dimension
Release Status	Released

### Purpose

This CDS view provides access to the master data of a fixed asset. The attributes of the fixed asset business entity include the company code, asset, and asset sub-number, as well as the asset class and the supplier.

This CDS view provides the prerequisites for answering the following business questions:

What are my fixed assets?

What are my fixed assets of a certain asset class?

What are the capitalization dates of my fixed assets?

What are my retired assets?

### Prerequisites

You have authorizations to display the relevant company codes and asset classes (authorization object A\_S\_ANLKL).

### Structure

Business Objects - This view is built on the following business object: Fixed asset

## Fixed Asset Group

CDS View Name	I_FixedAssetGroup
Business Role (Template)	SAP_BR_AA_ACCOUNTANT: Asset Accountant
Data Category	Dimension
Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business question:

How many fixed asset groups are defined?

### Structure

Business Objects - This view is built on the following business object: Fixed asset

## Fixed Asset (Country-Dependent Data)

CDS View Name	I_FixedAssetCountryData
Business Role (Template)	SAP_BR_AA_ACCOUNTANT: Asset Accountant
Data Category	Dimension
Status	Released

### Purpose

This CDS view provides access to the country-dependent master data of a fixed asset. The country-dependent attributes of the fixed asset business entity provide dimensions of the following countries:

This CDS view provides the prerequisites for answering the following business questions:

What is the country-dependent data of my fixed assets?

What are the national classification codes of my fixed assets?

### Prerequisites

You have the authorization for the following authorization objects: F\_BKPF\_BUK

## Fixed Asset (Ledger-Dependent Data)

CDS View Name	I_FixedAssetForLedger
Business Role (Template)	SAP_BR_AA_ACCOUNTANT: Asset Accountant
Data Category	Dimension
Status	Released

### Purpose

This CDS view provides access to the ledger-dependent master data of a fixed asset. The ledger-dependent attributes of the fixed asset business entity provide dates of the asset lifecycle.

This CDS view provides the prerequisites for answering the following business questions.

What are the capitalization dates of my fixed assets?

What are the deactivation dates of my fixed assets?

### Prerequisites

You have the authorization for the following authorization objects:

A\_S\_GSBER,

A\_S\_KOSTL,

A\_S\_WERK,

A\_S\_ANLKL

## Fixed Asset (Time-Dependent Data)

CDS View Name	I_FixedAssetAssgmt
Business Role (Template)	SAP_BR_AA_ACCOUNTANT: Asset Accountant
Data Category	Dimension
Status	Released

### Purpose

This CDS view provides access to the time-dependent master data of a fixed asset. The time-dependent attributes of the fixed asset business entity provide account assignment objects and location information.

This CDS view provides the prerequisites for answering the following business questions:

What are the cost centers of my fixed assets?

What are the profit centers of my fixed assets?

What are the segments of my fixed assets?

### Prerequisites

You have the authorization for the following authorization objects:

A\_S\_GSBER

A\_S\_KOSTL

A\_S\_WERK

A\_S\_ANLKL

## Fixed Asset Valuation (Ledger-Dependent Data)

CDS View Name	I_AssetValuationForLedger
Business Role (Template)	SAP_BR_AA_ACCOUNTANT: Asset Accountant
Data Category	Dimension
Status	Released

### Purpose

This CDS view provides access to the ledger-dependent valuation master data of a fixed asset. The ledger-dependent attributes of the fixed asset valuation business entity provide depreciation-related data that are time-dependent.

This CDS view provides the prerequisites for answering the following business questions:

What are the depreciation keys of my fixed assets?

What is the planned useful life of my fixed assets?

What are the depreciation start dates of my fixed assets?

### Prerequisites

You have the authorization for the following authorization objects:

A\_S\_GSBER

A\_S\_KOSTL

A\_S\_WERK

A\_S\_ANLKL

## Asset Class

CDS View Name	I_AssetClass
Business Role (Template)	SAP_BR_AA_ACCOUNTANT: Asset Accountant
Data Category	Dimension
Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business questions:

How many asset classes are defined?

What are the asset account determinations of my asset classes?

## Depreciation Key

CDS View Name	I_DepreciationKey
Business Role (Template)	SAP_BR_AA_ACCOUNTANT: Asset Accountant
Data Category	Dimension
Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business question:

How many depreciation keys are defined?

## Depreciation Area

CDS View Name	I_DepreciationAreaForLedger
Business Role (Template)	SAP_BR_AA_ACCOUNTANT: Asset Accountant
Data Category	Dimension
Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business question:

How many depreciation areas are defined in a company code / ledger?

## Depreciation Area Text

CDS View Name	I_DeprAreaForLedgerText
Business Role (Template)	SAP_BR_AA_ACCOUNTANT: Asset Accountant
Data Category	Text
Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business question:

How many depreciation areas are defined in a company code / ledger?

## Chart of Depreciation

CDS View Name	I_ChartOfDepreciation
Business Role (Template)	SAP_BR_AA_ACCOUNTANT: Asset Accountant
Data Category	Dimension
Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business question:

How many charts of depreciation are defined?

## Chart of Depreciation Text

CDS View Name	I_ChartOfDepreciationText
Business Role (Template)	SAP_BR_AA_ACCOUNTANT: Asset Accountant
Data Category	Text
Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business question:

How many charts of depreciation are defined?

### **Asset Transaction Type**

CDS View Name	I_AssetTransactionType
Business Role (Template)	SAP_BR_AA_ACCOUNTANT: Asset Accountant
Data Category	Dimension
Status	Released

#### **Purpose**

This CDS view provides the prerequisites for answering the following business question:

How many asset transaction types are defined?

### **Asset Transaction Type Text**

CDS View Name	I_AssetTransactionTypeText
Business Role (Template)	SAP_BR_AA_ACCOUNTANT: Asset Accountant
Data Category	Text
Status	Released

#### **Purpose**

This CDS view provides the prerequisites for answering the following business question:

How many asset transaction types are defined?

### **Asset Account Determination**

CDS View Name	I_AssetAcctDetermination
Business Role (Template)	SAP_BR_AA_ACCOUNTANT: Asset Accountant
Data Category	Dimension
Status	Released

#### **Purpose**

This CDS view provides the prerequisites for answering the following business question:

How many asset account determinations are defined?

## Asset Accounting Key Figure

CDS View Name	I_AssetKeyFigure
Business Role (Template)	SAP_BR_AA_ACCOUNTANT: Asset Accountant
Data Category	Dimension
Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business question:

How many asset accounting key figures are defined?

## Asset Accounting Key Figure Text

CDS View Name	I_AssetKeyFigureText
Business Role (Template)	SAP_BR_AA_ACCOUNTANT: Asset Accountant
Data Category	Text
Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business question:

How many asset accounting key figures are defined?

## Asset Accounting Key Figure Group

CDS View Name	I_AssetKeyFigureSet
Business Role (Template)	SAP_BR_AA_ACCOUNTANT: Asset Accountant
Data Category	Dimension
Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business question:

How many asset accounting key figure groups are defined?

## Asset Accounting Key Figure Group Text

CDS View Name	I_AssetKeyFigureSetText
Business Role (Template)	SAP_BR_AA_ACCOUNTANT: Asset Accountant
Data Category	Text
Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business questions:

Sorted Asset Accounting Key Figure

Sorting Sequence

## Asset Accounting Key Figure Group Specification (With Sorting Sequence)

CDS View Name	I_AssetSortedKeyFigureSetSpec
Business Role (Template)	SAP_BR_AA_ACCOUNTANT: Asset Accountant
Data Category	Dimension
Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business question:

In which sorting sequence are the key figures of my key figure groups for Asset Balances and Asset History Sheet defined?

## Evaluation Group 1

CDS View Name	I_Group1AssetEvaluationKey
Related Text View	I_Group1AssetEvaluationKeyText
Business Role (Template)	SAP_BR_AA_ACCOUNTANT: Asset Accountant
Data Category	Dimension
Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business question:

How many evaluation groups for fixed assets are defined?

## Evaluation Group 2

CDS View Name	I_Group2AssetEvaluationKey
Related Text View	I_Group2AssetEvaluationKeyText
Business Role (Template)	SAP_BR_AA_ACCOUNTANT: Asset Accountant
Data Category	Dimension
Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business question:

- How many evaluation groups for fixed assets are defined?

## Evaluation Group 3

CDS View Name	I_Group3AssetEvaluationKey
Related Text View	I_Group3AssetEvaluationKeyText
Business Role (Template)	SAP_BR_AA_ACCOUNTANT: Asset Accountant
Data Category	Dimension
Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business question:

How many evaluation groups for fixed assets are defined?

## Evaluation Group 4

CDS View Name	I_Group4AssetEvaluationKey
Related Text View	I_Group4AssetEvaluationKeyText
Business Role (Template)	SAP_BR_AA_ACCOUNTANT: Asset Accountant
Data Category	Dimension
Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business question:

How many evaluation groups for fixed assets are defined

## Evaluation Group 5

CDS View Name	I_Group5AssetEvaluationKey
Related Text View	I_Group5AssetEvaluationKeyText
Business Role (Template)	SAP_BR_AA_ACCOUNTANT: Asset Accountant
Data Category	Dimension
Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business question:

How many evaluation groups for fixed assets are defined?

## Financial Statement Item

Technical Name	I_CnslDtnFinStmntItem
View Type	Dimension
Release Status	Released

This CDS view provides access to the master data for financial statement (FS) items in financial consolidation. This CDS view provides the prerequisites for answering the following business questions:  
What is the consolidation chart of accounts of my FS items?

Is a certain FS item a value item, totals item, or text item?

Is a certain FS item used as an asset item, liability/equity item, income statement item, or statistical item?

What is the debit/credit sign of my FS items? What are the sub-assignments for my FS items?

### Prerequisites

You have authorization to display the relevant consolidation chart of accounts (authorization object E\_CS\_ITCLG).

Consolidation chart of accounts FS item type

## Consolidation Dimension

Technical Name	I_CnsltdtnDimension
View Type	Dimension
Release Status	Released

### Purpose

This CDS view provides access to the master data for a dimension in financial consolidation.

### Prerequisites

You have authorization to display the relevant consolidation dimension (authorization object E\_CS\_DIMEN).

## Consolidation Ledger

Technical Name	I_CnsltdtnLedger
View Type	Dimension
Release Status	Released

### Purpose

This CDS view provides access to the master data for a consolidation ledger.

This CDS view provides the prerequisites for answering the following business questions:

What is the description of my consolidation ledges?

What is the group currency for a certain consolidation ledger?

### Prerequisites

You have authorization to display the relevant ledgers (authorization object G\_881\_GRLD).

## Consolidation Version

Technical Name	I_CnsldtnVersion
View Type	Dimension

Technical Name	I_CnsldtnVersion
Release Status	Released

### Purpose

This CDS view provides access to the master data of a consolidation version.

This CDS view provides the prerequisites for answering the following business questions:

What is the data entry version, tax rate version, and reporting rule version for my consolidation versions?

### Prerequisites

You have authorization to display the relevant consolidation versions (authorization object E\_CS\_RVERS).

## Consolidation Chart of Accounts

Technical Name	I_CnsldtnChartOfAccounts
View Type	Dimension
Release Status	Released

### Purpose

This CDS view provides access to the master data of a consolidation chart of accounts.

### Prerequisites

You have authorization to display the relevant consolidation chart of accounts (authorization object E\_CS\_ITCLG).

## Consolidation Group

Technical Name	I_CnsltdtnGroup
View Type	Dimension
Release Status	Released

### Purpose

This CDS view provides access to the master data of a consolidation group.

This CDS view provides the prerequisites for answering the following business questions:

What is the consolidation dimension for my consolidation groups or subgroups?

What is the hierarchy level of a certain group within a hierarchy of consolidation groups?

### Prerequisites

You have authorization to display the relevant consolidation groups (authorization object E\_CS\_CONGR).

## Consolidation Unit

Technical Name	I_CnsltdtnUnit
View Type	Dimension
Release Status	Released

### Purpose

This CDS view provides access to the master data of a consolidation unit.

This CDS view provides the prerequisites for answering the following business questions:

What is the consolidation dimension for my consolidation units?

What is the hierarchy level of a certain unit within a hierarchy of consolidation units?

### Prerequisites

You have authorization to display the relevant consolidation groups (authorization object E\_CS\_BUNIT).

## Subitem Category

Technical Name	I_CnslDtnSubItemCategory
View Type	Dimension
Release Status	Released

### Purpose

This CDS view provides access to subitem categories of financial statement items in consolidation.

## Subitem

Technical Name	I_CnslDtnSubItem
View Type	Dimension
Release Status	Released

### Purpose

This CDS view provides access to the master data of subitems of financial statement items in consolidation.

## Document Type

Technical Name	I_CnslDtnDocumentType
View Type	Dimension
Release Status	Released

### Purpose

This CDS view provides access to the master data for consolidation-related document types. This CDS view provides the prerequisites for answering the following business questions:

What is the consolidation dimension of my document types?

What is the posting level of a certain document type?

Can a document type be posted in transaction currency, local currency, or group currency?

What is the balance check behavior when posting with a certain document type? Is the document type used for manual or automatic posting?

## Posting Level

Technical Name	I_CnslDtnPostingLevel
View Type	Dimension
Release Status	Released

### Purpose

This CDS view provides access to the master data for posting levels in financial consolidation.

## Accounting Document Type

Technical Name	I_AccountingDocumen tType
View Type	Dimension
Release Status	Released

### Purpose

This CDS view provides access to the master data of accounting document types. The attributes of the accounting document type business entity include the document type, the assigned number range, the authorization group, and the exchange rate type.

This CDS view provides the prerequisites for answering the following business questions:

How many accounting document types are defined?

Which number range is assigned to the accounting document type?

Which authorization group is assigned to the accounting document type?

Which exchange rate type is assigned to the accounting document type?

### Prerequisites

You can create reports for General Ledger Accounting using this CDS view. Users who want to run these reports must be able to display data for the following fields:

Authorization Object	Fields With Display Access Needed
F_BKPF_BLA	Authorization Group

These authorization objects are edited using transaction PFCG.

## Accounting Document Type Text

Technical Name	I_AccountingDocumentTypeText
View Type	Text
Release Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business questions:

How many accounting document type descriptions are defined in different languages?

### Prerequisites

You can create reports for General Ledger Accounting using this CDS view. Users who want to run these reports must be able to display data for the following fields:

Authorization Object	Fields With Display Access Needed
F_BKPF_BLA	Authorization Group

These authorization objects are edited using transaction PFCG.

## Chart of Accounts

Technical Name	I_ChartofAccounts
View Type	Dimension
Release Status	Released

### Purpose

This CDS view provides access to the master data of chart of accounts. The attributes of the chart of accounts business entity include the chart of accounts, the group chart of accounts, the blocked indicator, and the maintenance language.

This CDS view provides the prerequisites for answering the following business questions:

How many charts of accounts are defined?

Which language is the maintenance language?

Which chart of accounts is blocked?

## Prerequisites

You can create reports for General Ledger Accounting using this CDS view. Users who want to run these reports must be able to display data for the following fields:

Authorization Object	Fields With Display Access Needed
F_SKA1_KTP	Chart of Accounts

These authorization objects are edited using transaction PFCG.

## Chart of Accounts Text

Technical Name	I_ChartOfAccountsText
View Type	Text
Release Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business questions:

How many chart of accounts descriptions are defined in different languages?

### Prerequisites

You can create reports for General Ledger Accounting using this CDS view. Users who want to run these reports must be able to display data for the following fields:

Authorization Object	Fields With Display Access Needed
F_SKA1_KTP	Chart of Accounts

These authorization objects are edited using transaction PFCG.

## Currency Role

Technical Name	I_CurrencyRole
View Type	Dimension
Release Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business questions:

How many currency roles are defined?

## Currency Role Text

Technical Name	I_CurrencyRoleText
View Type	Text
Release Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business questions:

How many currency roles are defined?

## Debit Credit Code

Technical Name	I_DebitCreditCode
View Type	Dimension
Release Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business questions:

Which codes are defined for debit and credit transactions?

## Debit Credit Code Text

Technical Name	I_DebitCreditCodeText
View Type	Text
Release Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business questions:

What are the descriptions of credit and debit terms in the optional language?

## Functional Area

Technical Name	I_FunctionalArea
View Type	Dimension
Release Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business questions:

How many functional areas are defined?

## Functional Area Text

Technical Name	I_FunctionalArea Text
View Type	Text
Release Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business questions:

What are the descriptions of the functional areas in the optional language?

## G/L Account Group

Technical Name	I_GLAccountGroup
View Type	Dimension
Release Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business questions:

How many G/L account groups are defined?

### Prerequisites

You can create reports for General Ledger Accounting using this CDS view. Users who want to run these reports must be able to display data for the following fields:

Authorization Object	Fields With Display Access Needed
F_SKA1_KTP	Chart of Accounts

These authorization objects are edited using transaction PFCG.

## G/L Account Group Text

Technical Name	I_GLAccountGroupText
View Type	Text
Release Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business questions:

How many G/L account groups descriptions are defined in different languages?

### Prerequisites

You can create reports for General Ledger Accounting using this CDS view. Users who want to run these reports must be able to display data for the following fields:

Authorization Object	Fields With Display Access Needed
F_SKA1_KTP	Chart of Accounts

These authorization objects are edited using transaction PFCG.

## G/L Account Type

Technical Name	I_Glaccounttype
View Type	Dimension
Release Status	Released

### Purpose

This CDS View processes the access to the master data of the G/L account type. This CDS view provides the prerequisites for answering the following business questions:

How many G/L account types are defined?

## G/L Account Type Text

Technical Name	I_Glaccounttypetext
View Type	Text
Release Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business questions:

How many G/L account types descriptions are defined in different languages?

## Global Company

Technical Name	I_Globalcompany
View Type	Dimension

Technical Name	I_Globalcompany
Release Status	Released

### Purpose

This CDS View processes access to the master data of global companies. The attributes of the global company business entity include company, company name, and company currency. This CDS view provides the prerequisites for answering the following business questions:

How many global companies are defined?

What is the company currency of the company?

## Joint Venture Recovery

Technical Name	I_JointVentureRecovery
View Type	Dimension
Release Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business questions:

How many joint venture recovery codes are defined?

### Prerequisites

You can create reports for General Ledger Accounting using this CDS view. Users who want to run these reports must be able to display data for the following fields:

Authorization Object	Fields With Display Access Needed
F_SKA1_BUK	Company Code

These authorization objects are edited using transaction PFCG.

## Joint Venture Recovery Text

Technical Name	I_JointVentureRecoveryText
View Type	Text
Release Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business questions:

How many joint venture recovery codes are defined?

### Prerequisites

You can create reports for General Ledger Accounting using this CDS view. Users who want to run these reports must be able to display data for the following fields:

Authorization Object	Fields With Display Access Needed
F_SKA1_BUK	Company Code

These authorization objects are edited using transaction PFCG.

## Ledger

Technical Name	I_Ledger
View Type	Dimension
Release Status	Released

### Purpose

This CDS view provides access to the master data of ledgers. The attributes of the ledger business entity include the ledger, the leading ledger indicator, the ledger application, and the ledger sub-application. This CDS view provides the prerequisites for answering the following business questions:

How many ledgers are defined?

Which ledger is the leading ledger?

Which application and sub-application the ledger is assigned to?

### Prerequisites

You can create reports for General Ledger Accounting using this CDS view. Users who want to run these reports must be able to display data for the following fields:

Authorization Object	Fields With Display Access Needed
F_FAGL_LDR	Ledger

These authorization objects are edited using transaction PFCG.

## Ledger Group

Technical Name	I_LedgerGroup
View Type	Dimension
Release Status	Released

### Purpose

This CDS view provides ledger group information. This CDS view provides the prerequisites for answering the following business questions:

How many ledger groups are defined?

## Ledger Group Text

Technical Name	I_LedgerGroupText
View Type	Text
Release Status	Released

### Purpose

This CDS view provides access to ledger group names. This CDS view provides the prerequisites for answering the following business questions:

How many ledger groups are defined?

## Ledger Text

Technical Name	I_LedgerText
View Type	Dimension
Release Status	Released

### Purpose

This CDS view provides access to ledger names in different languages. This CDS view provides the prerequisites for answering the following business questions:

What is the ledger name in a specific language?

### Prerequisites

You can create reports for General Ledger Accounting using this CDS view. Users who want to run these reports must be able to display data for the following fields:

Authorization Object	Fields With Display Access Needed
F_FAGL_LDR	Ledger

These authorization objects are edited using transaction PFCG.

## Source Ledger

CDS View Name	I_LedgerSourceLedger
Data Category	Dimension
Status	Released
Data Extraction Type	Full (physical deletions are possible in source tables)

### Purpose

This CDS view provides access to the assignment of a ledger to the source ledger in question. This CDS view provides the prerequisites for answering the following business questions:

Which ledger is assigned to which source ledger?

This CDS view is enabled for data extraction to SAP BW/4HANA.

### Prerequisites

You have authorizations to access certain ledgers (authorization object: F\_FAGL\_LDR).

## Multi Currency Accounting

Technical Name	I_MultiCurrencyAccounting
View Type	Dimension
Release Status	Released

### Purpose

This CDS view provides access to the master data of multicurrency accounting. This CDS view provides the prerequisites for answering the following business questions:

How many multicurrency accounting (MCA) keys are defined?

## Multicurrency Accounting Text

Technical Name	I_MultiCurrencyAccountingText
View Type	Text
Release Status	Released

### Purpose

This CDS view provides access to multicurrency accounting names in different languages. This CDS view provides the prerequisites for answering the following business questions:

What is the multicurrency accounting name in a specific language?

## Reconciliation Account Type Text

Technical Name	I_ReconciliationAcctTypeText
View Type	Text
Release Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business questions:

How many the reconciliation account type descriptions are defined in different languages?

## Semantic Tag

Technical Name	I_SEMANTICTAG
View Type	Basic
Release Status	Released

### Purpose

This CDS view provides the information for answering the following business questions:

Which semantic tags are available in this system?

What are the descriptions of the different semantic tags in different languages?

## Accounting Principle

CDS View Name	I_AccountingPrinciple
Data Category	Dimension
Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business question:

How many accounting principles are defined?

## Accounting Principle Text

CDS View Name	I_AccountingPrincipleText
Data Category	Text
Status	Released

### Purpose

This CDS view provides the prerequisites for answering the following business question:

What are the descriptions of accounting principles in different language?

---
